Measurement

Measuring in Mixed Units

Aim

- I can use mixed units to measure and record length.

Success Criteria

- I can measure in centimetres and millimetres.
- I can measure and record length in metres and centimetres.

Order It - Length

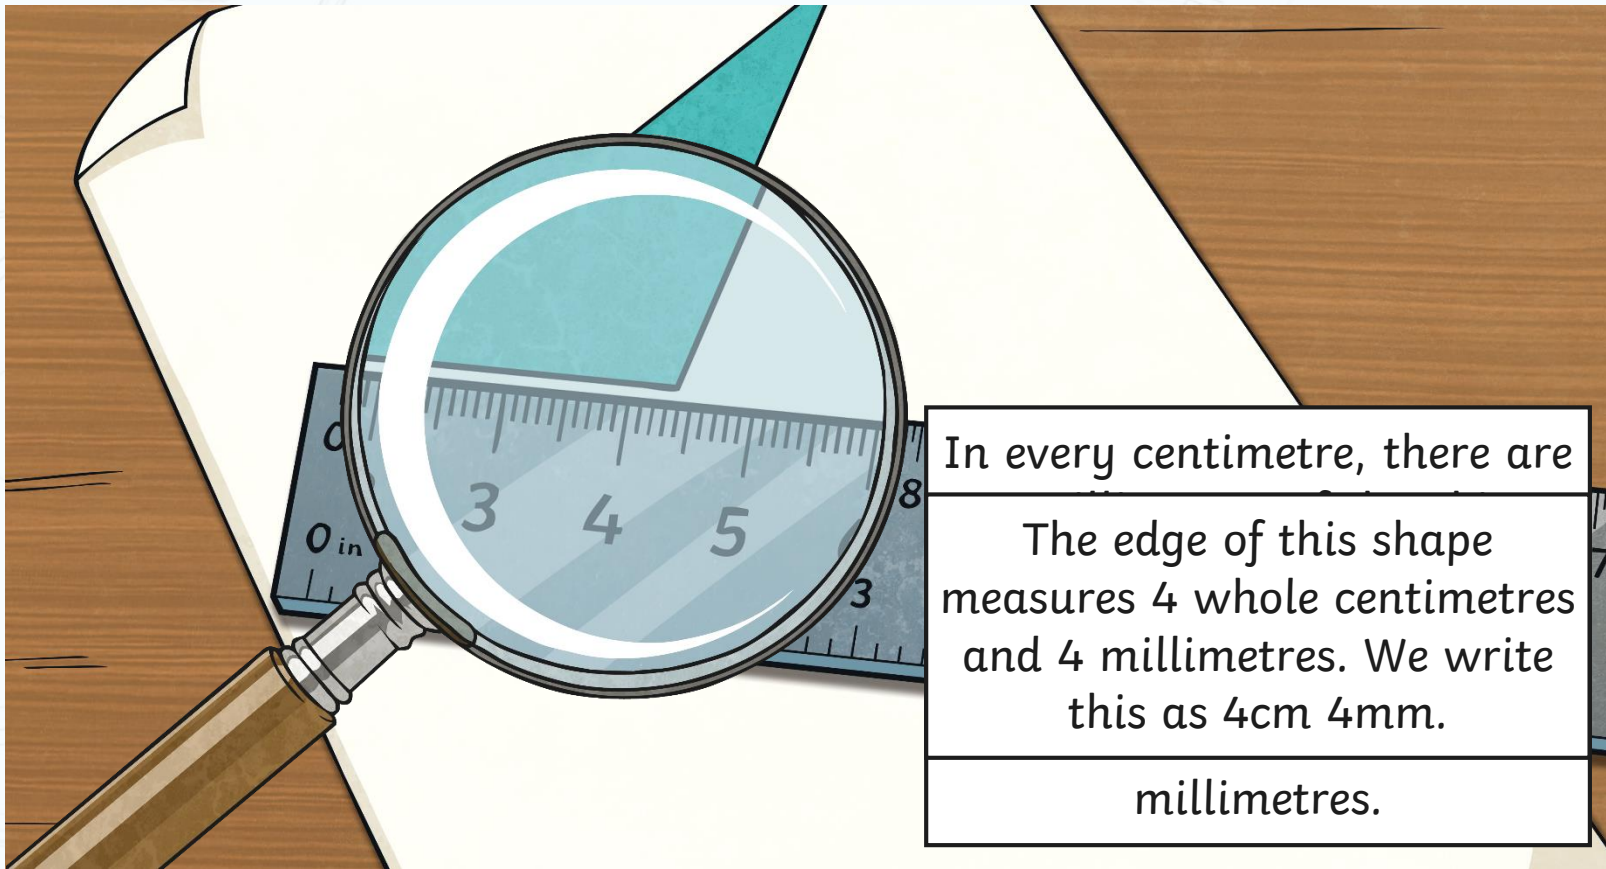

Here are some length measurements. Order them from shortest to longest.

Measuring in Centimetres and Millimetres

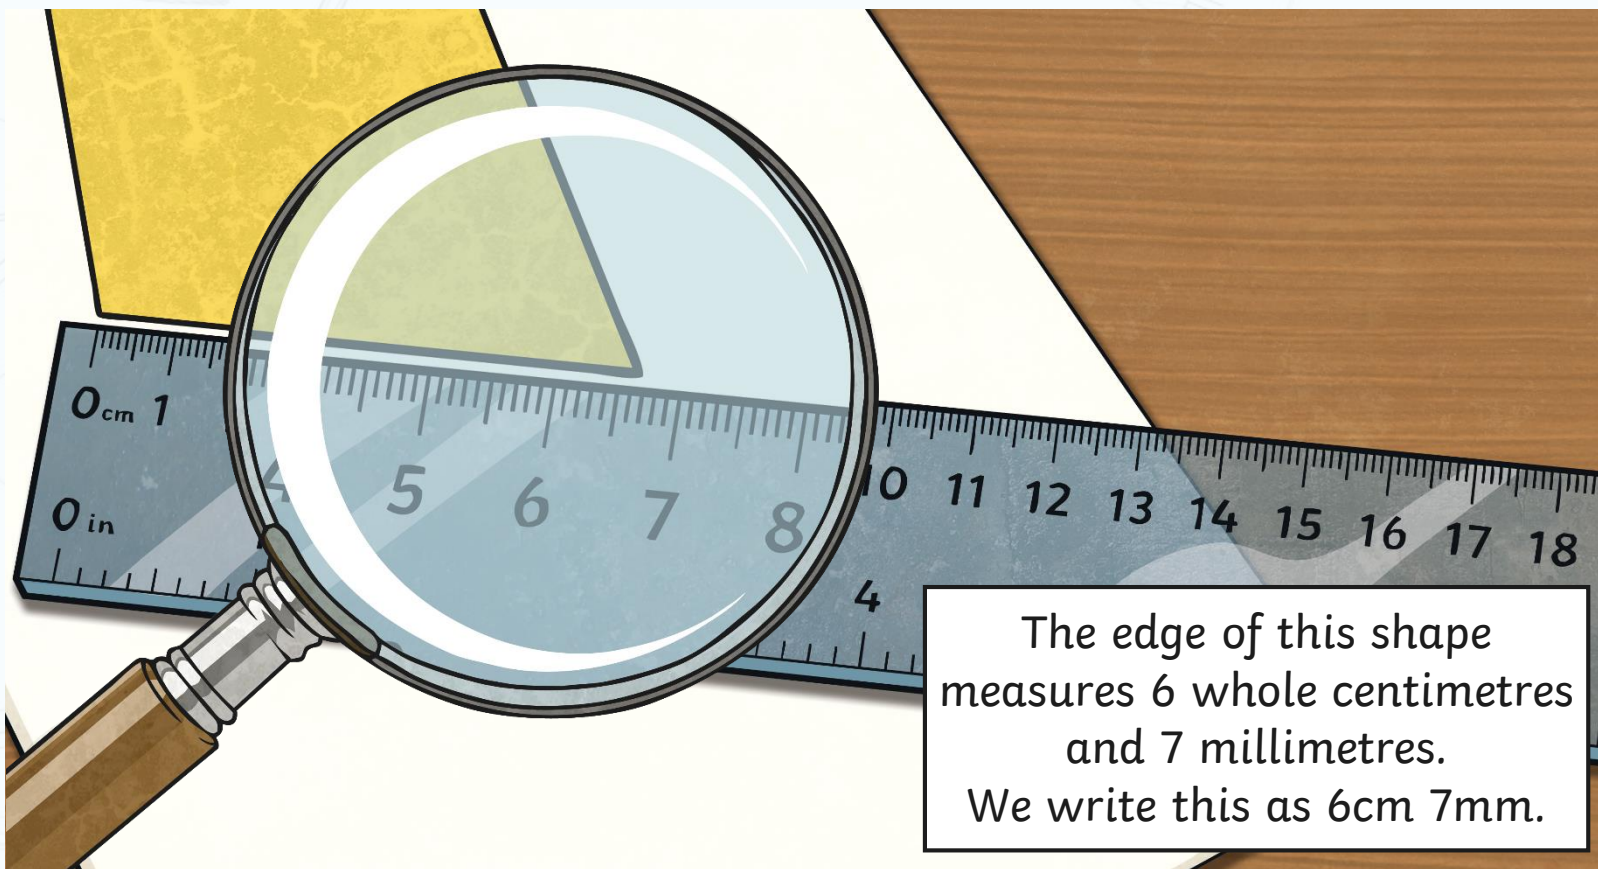

Sometimes when we measure length in metres or in centimetres, the measurement isn't exact. When this happens, we need to use mixed units.

Measuring in Centimetres and Millimetres

What does the edge of this shape measure?

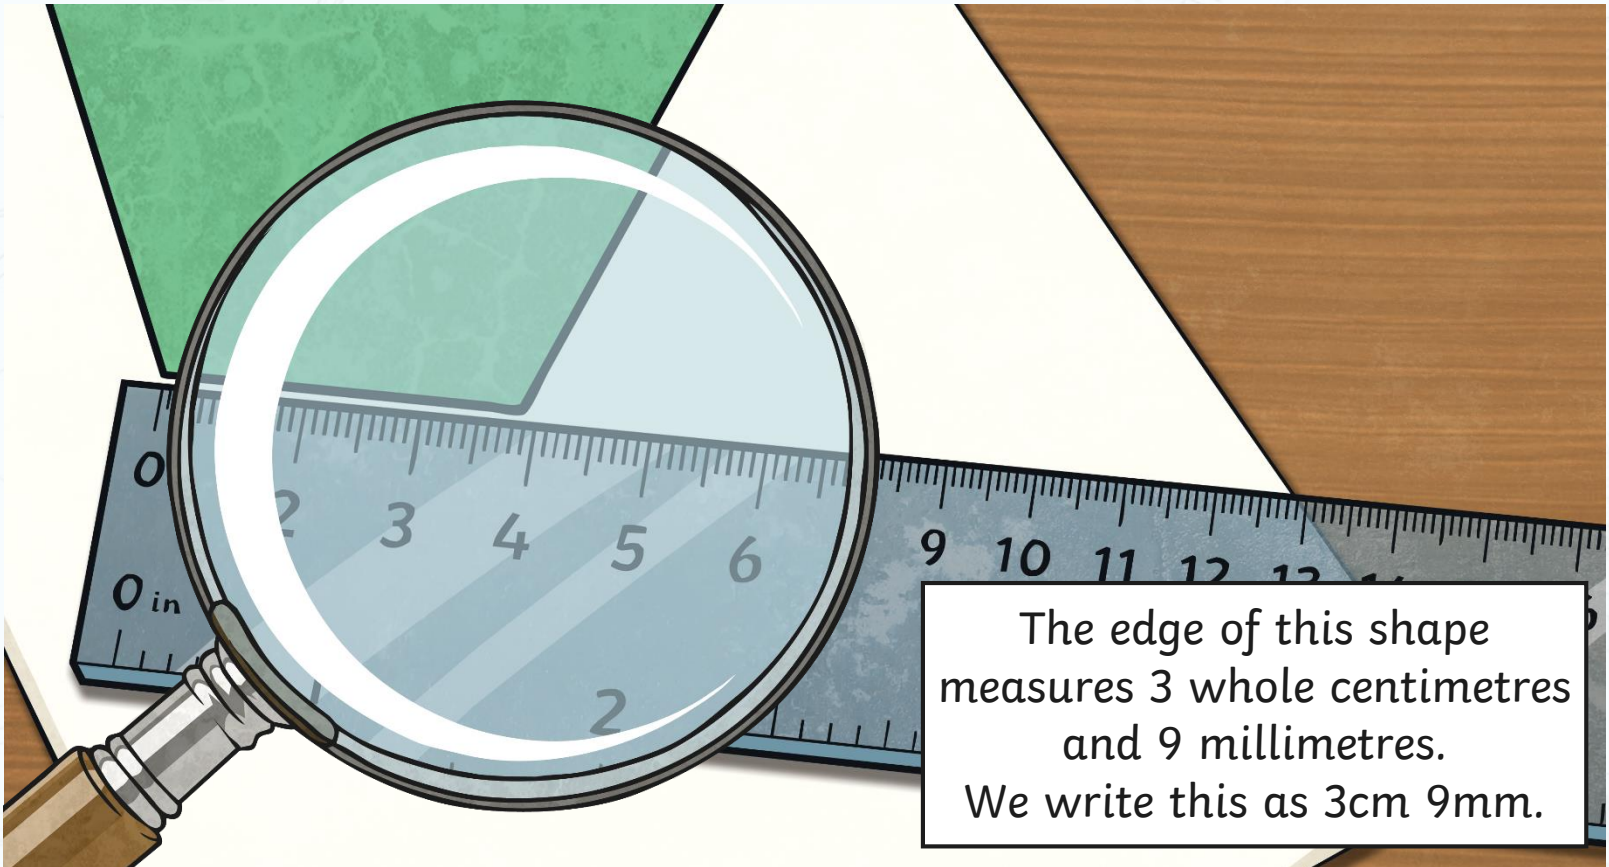

The edge of this shape measures 6 whole centimetres and 7 millimetres.
We write this as 6cm 7mm.

Measuring in Centimetres and Millimetres

What does the edge of this shape measure?

The edge of this shape measures 3 whole centimetres and 9 millimetres.
We write this as 3cm 9mm.

Measuring in Centimetres and Millimetres

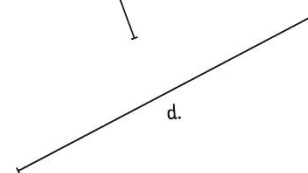

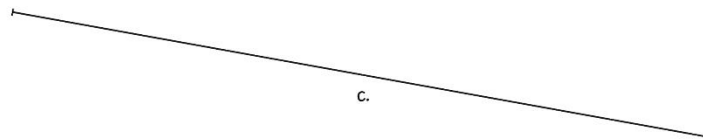

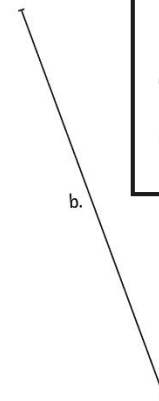

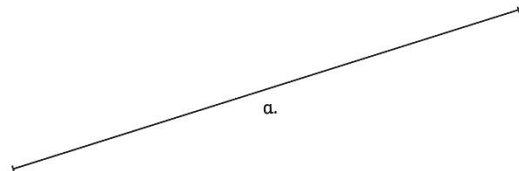

With your partner, measure the lines on the Measuring in Centimetres and Millimetres Activity Sheet

Measuring in Centimetres and Millimetres

I can use mixed units to measure and record length.

Measure these lines in centimetres and millimetres:

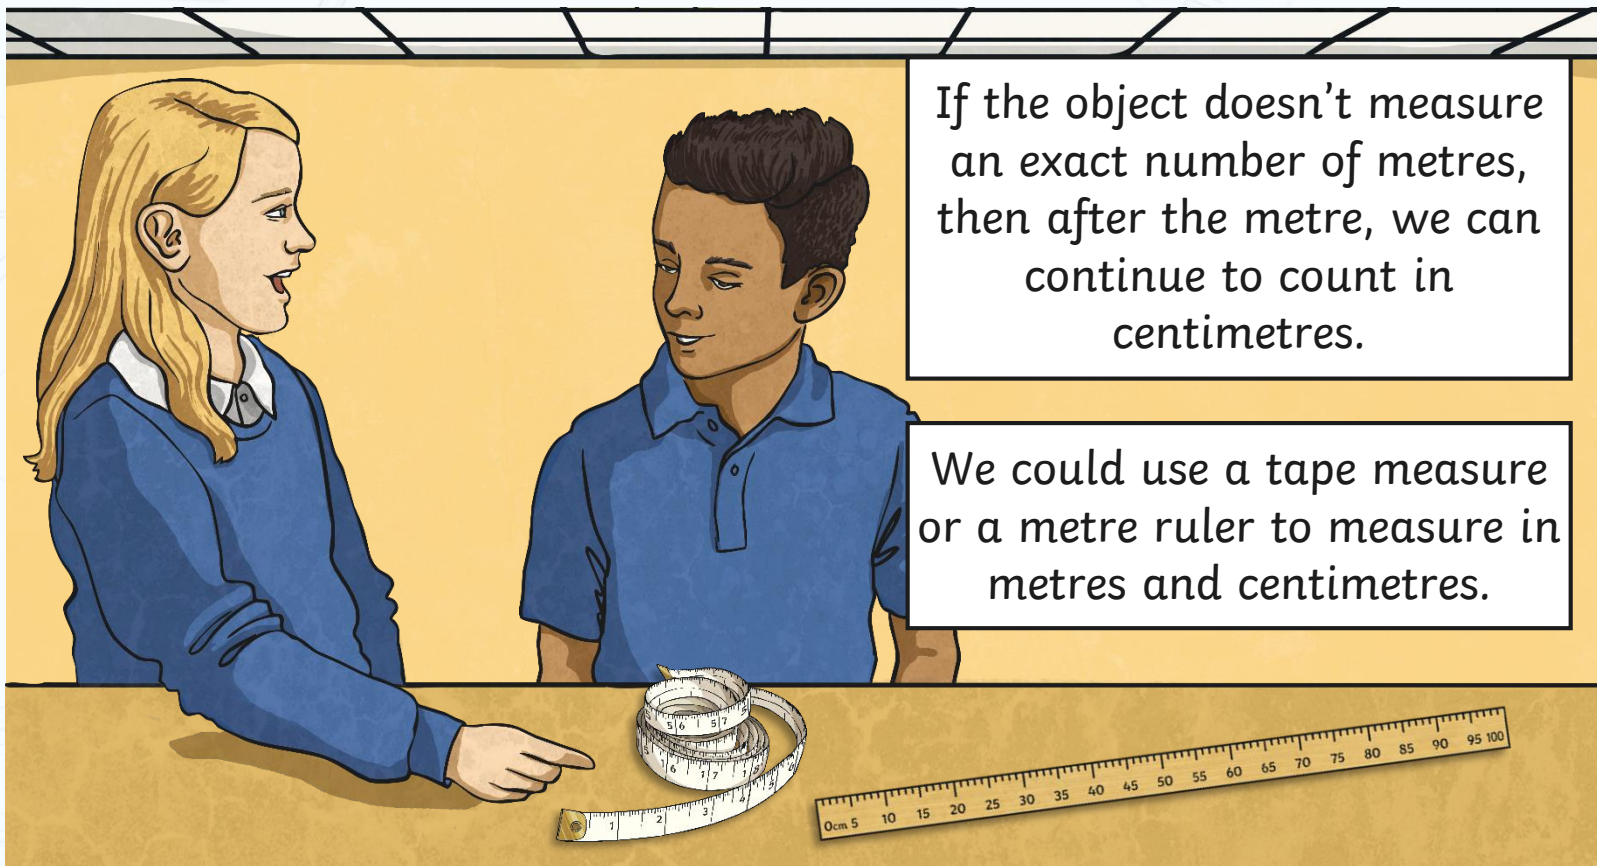

Answers:

- a) 12cm 6mm
- b) 9cm 7mm
- c) 16cm 4mm
- d) 8cm 2mm

Measuring in Metres and Centimetres

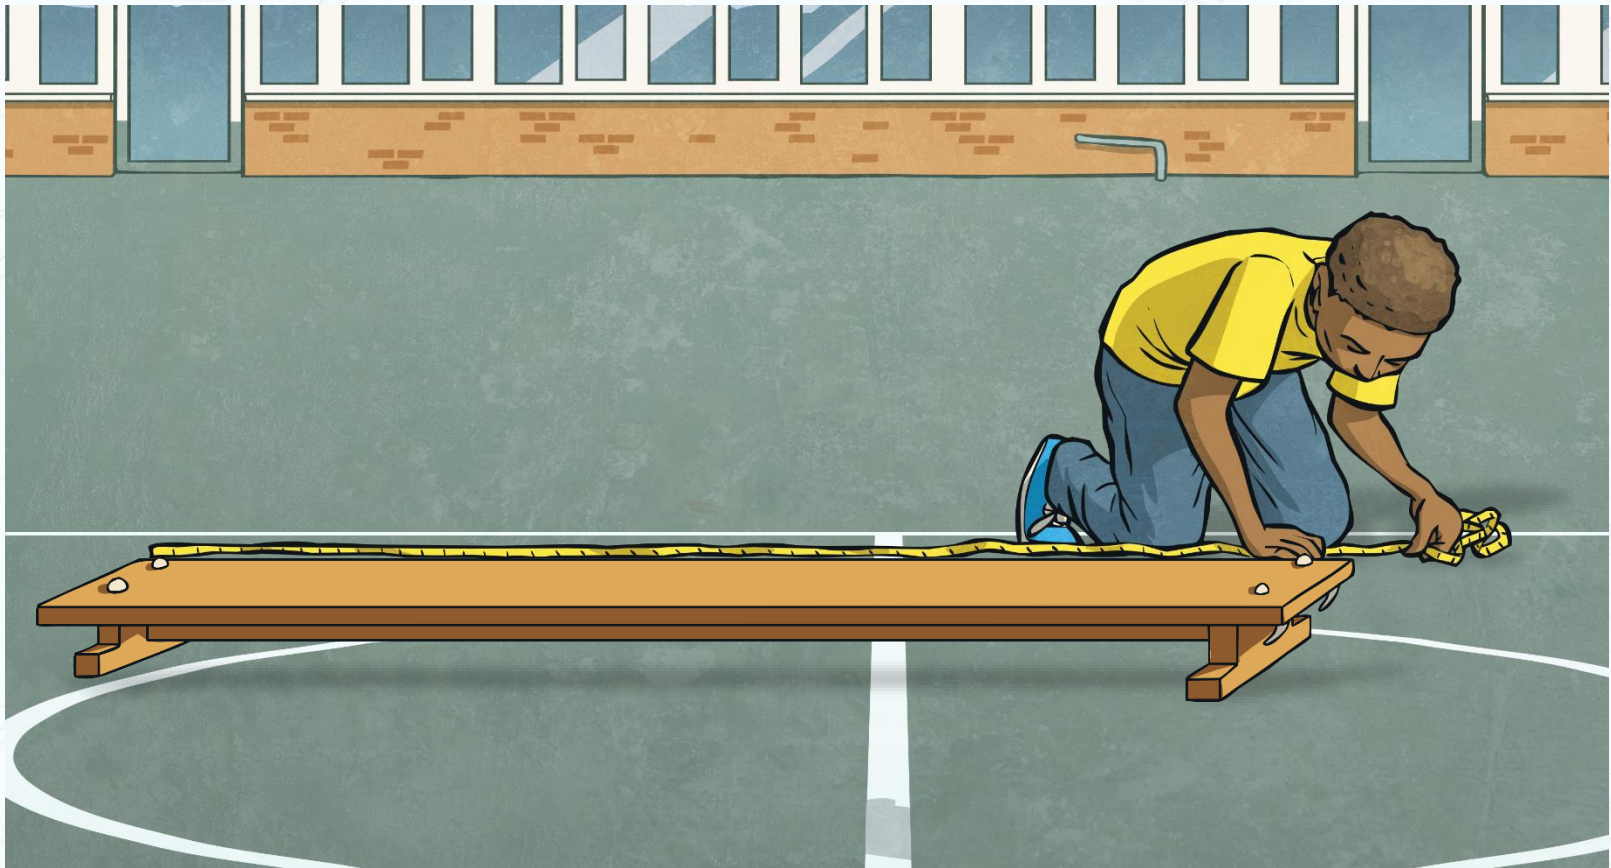

When measuring larger objects, sometimes we need to measure in metres and centimetres. In every metre, there are 100 centimetres.

Measuring in Centimetres and Millimetres

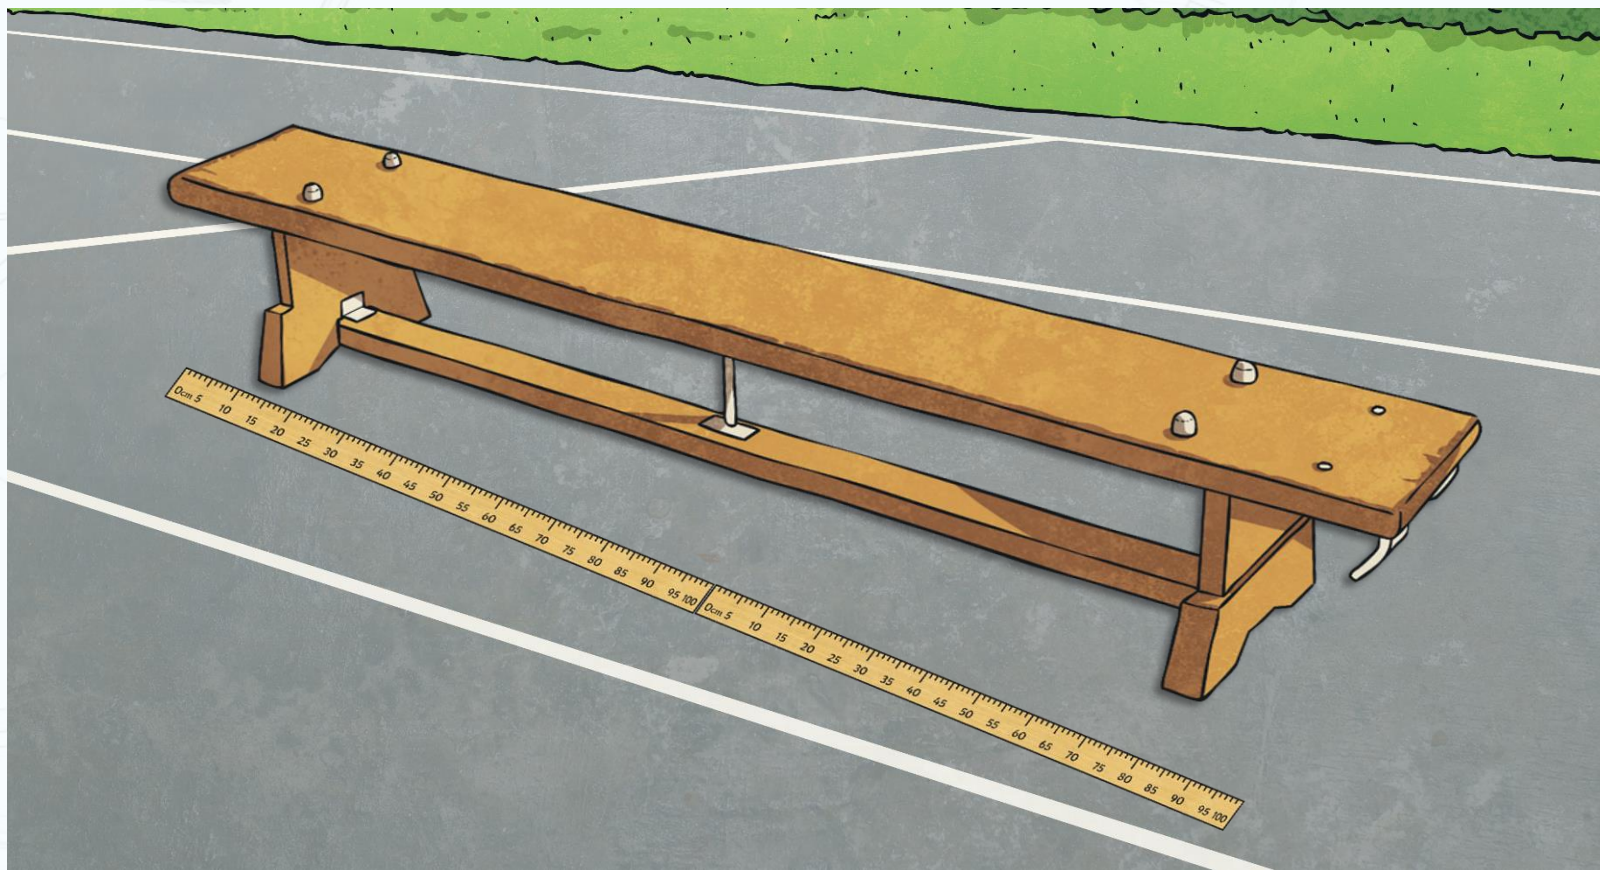

When using a tape measure, you measure the whole metres first, then continue to measure in centimetres.

Measuring in Metres and Centimetres

When using a metre ruler, measure out metres, then count the extra centimetres.

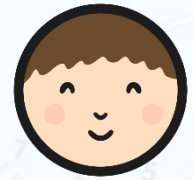

Measuring in Metres and Centimetres

With your partner, choose 3 objects to measure in metres and centimetres.
Ask another pair to check your measurements.

Measuring in Mixed Units

Use your measuring mastery to complete these activity sheets.
Make sure to measure in whole centimetres and millimetres.

Measuring Body Parts

You are going to work with a partner to measure these body parts in centimetres and millimetres.

- The d
 - The d
 - The d
- Which body part has the **greatest** measurement?
- Which body part has the **smallest** measurement?
- are not
will you
?

Aim

- I can use mixed units to measure and record length.

Success Criteria

- I can measure in centimetres and millimetres.
- I can measure and record length in metres and centimetres.
