

Grange Primary School

Science Curriculum Overview

	Autumn	Spring	Summer
Year 1	<p><u>Seasonal change</u></p> <ul style="list-style-type: none"> Name the four seasons in order and describe the typical weather in each. Name some activities and events in the four seasons. Describe the appearance of a tree's leaves in each season. Complete a pictogram and use it to answer simple questions. Recall that summer has the most daylight hours and winter has the least daylight hours. Recording data about the temperature across the four seasons. Label a map of the UK with capital cities and seasonal weather symbols. <p><u>Materials</u></p> <ul style="list-style-type: none"> Name objects and identify the materials they are made from. Recognise that objects are made from materials that suit their purpose. Recall that a property is how a material can be described Sort objects based on the materials they are made from. 	<p><u>Seasonal change</u></p> <ul style="list-style-type: none"> Name the four seasons in order and describe the typical weather in each. Name some activities and events in the four seasons. Describe the appearance of a tree's leaves in each season. Complete a pictogram and use it to answer simple questions. Recall that summer has the most daylight hours and winter has the least daylight hours. Recording data about the temperature across the four seasons. Label a map of the UK with capital cities and seasonal weather symbols. <p><u>Animals Including Humans – Comparing Animals</u></p> <ul style="list-style-type: none"> Name and describe the physical features of a range of animals. Sort animals into groups based on their similarities and differences. Identify characteristics specific to mammals, birds, reptiles, amphibians and fish. Recall the diets of carnivores, herbivores and omnivores. 	<p><u>Seasonal change</u></p> <ul style="list-style-type: none"> Name the four seasons in order and describe the typical weather in each. Name some activities and events in the four seasons. Describe the appearance of a tree's leaves in each season. Complete a pictogram and use it to answer simple questions. Recall that summer has the most daylight hours and winter has the least daylight hours. Recording data about the temperature across the four seasons. Label a map of the UK with capital cities and seasonal weather symbols. <p><u>Plants -TBU</u></p> <p>*I can identify and describe the basic structure of a variety of common plants including roots, stem/trunk, leaves and flowers.</p> <p>*Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees.</p> <p><u>Apply and consolidate</u></p>

Grange Primary School

Science Curriculum Overview

	<ul style="list-style-type: none"> • Group objects based on their properties. • Suggest ways to test materials for their properties. • Make predictions and recognise whether they were accurate. • Use their observations to answer questions. • Begin to recognise if a test is fair. 	<p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none"> • Use a non-fiction text to find out about specific animals' diets. • Recognise that there are different ways to gather data. • Record data in a block graph and use this to answer questions. • Recognise what the scientist Jane Goodall was known for. • Recall some of Jane Goodall's key findings. <p><u>Animals Including Humans – Comparing Animals</u></p> <ul style="list-style-type: none"> • Draw and label human body parts. • Identify the body parts associated with each sense. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none"> • Compare and group body parts. • Begin to recognise patterns in data and use these to answer questions. • Record data in a table. • Measure using non-standard units. 	
Year 2	<p><u>Animals including humans</u></p> <ul style="list-style-type: none"> • Identify stages in the life cycles of different animals, including humans. 	<p><u>Living Things – Habitats</u></p> <ul style="list-style-type: none"> • Ask questions to further their knowledge. 	<p><u>Plants - TBU</u></p> <ul style="list-style-type: none"> • I can observe and describe how seeds and bulbs grow into mature plants

Grange Primary School

Science Curriculum Overview

	<ul style="list-style-type: none"> Describe the basic survival needs of animals. Explain how to take care of personal hygiene. Describe some positive effects of exercise. Identify foods in different food groups. Measure using simple equipment. Record results in a table. Use data to answer a simple question. Research using secondary sources <p><u>Uses of Everyday Materials</u></p> <ul style="list-style-type: none"> Name objects with the same use that are made from different materials. Name materials that are used to make objects with different uses. Recognise that stretching, twisting, bending and squashing can cause some solid objects to change shape. Name properties that make materials suitable for their use. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none"> Measure using non-standard units. Recording results in a table. Use data to answer a simple question. Record results in a block graph. 	<ul style="list-style-type: none"> Recall some life processes, giving examples of how they apply to plants and animals. Classify objects into alive, never been alive and was once alive, giving reasons for their choices. Match different plants and animals to their habitats. Give examples of how animals use their habitat for food and shelter. Recall that plants produce their own food for energy. Name living things that are producers and place a producer at the beginning of a food chain. Use arrows to show the order in a food chain. <p><u>Living Things – Microhabitats</u></p> <ul style="list-style-type: none"> Identify and name a variety of plants and animals. Recall that minibeasts live in microhabitats. Describe microhabitats and their conditions. Describe how microhabitats provide for the basic needs of animals and plants. Describe the job role of a botanist. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none"> Group minibeasts and create simple classification keys. 	<ul style="list-style-type: none"> I can find out and describe how plants need light and a suitable temperature to grow and stay healthy. <p><u>Consolidation of units covered.</u></p>
--	---	---	--

Grange Primary School

Science Curriculum Overview

		<ul style="list-style-type: none"> • Ask questions and recognise that they can be answered in different ways. • Gather and record data and use it to answer questions. • Plan what observations to make in an experiment. • Order the steps of a method. • Describe the appearance of flowering plants. • Use an identification chart to name flowering plants 	
Year 3	<p>Animals including humans</p> <ul style="list-style-type: none"> • Recall the three key functions of the skeleton (movement, support and protection). • Describe a vertebrate, invertebrate, endoskeleton and exoskeleton and use this information to group animals. • Identify and name the skull, spine, ribs and pelvis on a diagram. • Recall that muscles cause movements in the body, some of which we can control consciously. • Describe that muscles can cause a movement by shortening and pulling on a bone. • Recall that animals, including humans, need to eat food to survive. • Describe some examples of how energy is used by the body and make comparisons about the energy demands between people. 	<p>Light</p> <ul style="list-style-type: none"> • Recall examples of light sources, objects that do not give out light and that darkness is the absence of light. • Describe ways to protect eyes from harm. • Describe what happens when light reflects, give examples of reflective surfaces or materials and describe factors that may affect the quality of a reflected image. • Describe how shadows form and identify patterns between groups of materials and the shadows produced. • Recall factors that affect the way a shadow appears, including what causes shadows to change throughout the day and factors that change the size of a shadow • Describe the pattern of changing shadows throughout the day. 	<p>Plants - TBU</p> <ul style="list-style-type: none"> • I can identify and describe the functions of different parts of flowering plants; roots, stem, leaves and flowers. • I can explore the requirements of plants for life and growth (air, light, water, nutrients from soil and room to grow) and how they vary from plant to plant. • I can investigate the ways in which water is transported within plants. *Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal. <p>Consolidation</p>

Grange Primary School

Science Curriculum Overview

	<ul style="list-style-type: none"> List some of the seven nutrient groups. Name foods that are good sources of nutrient groups and describe what they are needed for in the body. Compare two different meals and explain which is more balanced by naming the nutrient groups and commenting on the relevant proportions. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none"> Record measurements of different bones and use the data to sort them into size order. Describe some ways scientific research has improved the field of bionics/prosthetics, such as the choice of materials or linking their movement to muscles in the arm. Find relevant data on food packaging and make numerical comparisons. <p style="text-align: center;"><u>Rocks</u></p> <ul style="list-style-type: none"> Define the term 'rock'. Describe the appearance of different rocks; identifying both crystals and grains. Group rocks by their absorbency, hardness and reaction to acid rain (vinegar). List the different factors that break down rocks. Describe fossil formation and identify fossils in rocks. 	<ul style="list-style-type: none"> Describe how the light source's distance affects the shadow's size. Explain why a particular material is appropriate to make a shadow puppet and use knowledge of shadows to animate it. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none"> Recall what information needs recording to decide the number of columns in a results table and suggest suitable headings for the results table. Record information in the correct columns. Identify if a question is testable, explain why and plan ways to answer a testable question. Identify and explain why something is an advantage or disadvantage of a method and suggest an improvement to the experiment. I can describe patterns in data and quote values as evidence of patterns in data. I can identify odd results that do not fit the pattern. I can use patterns to make predictions for missing data. <p style="text-align: center;"><u>Forces and magnets</u></p> <ul style="list-style-type: none"> Identify examples of pushes, pulls and twists. Define a force including describing, naming and classifying contact and non-contact forces. 	
--	--	---	--

Grange Primary School

Science Curriculum Overview

	<ul style="list-style-type: none"> Describe the work of a palaeontologist. Name, describe and compare some different categories of soil. List some of the benefits of earthworms to the soil. Identify and describe the comparative size and weight of the layers in a sedimentation jar. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none"> Use a magnifying glass correctly to observe the appearance of a rock in detail. Use results to choose the appropriate rock type for a specific use, suggest a better choice of rock for a specific use and to predict how a rock will be affected by the weather. Research and present information on fossil formation using a single source. Use a model of the fossil record to determine the relative age of a fossil, to suggest how a living thing has changed over time and to suggest what living things were around in a certain era. Draw and label the bars on a bar chart. Accurately draw and label the layers of sediment in a sedimentation jar. 	<ul style="list-style-type: none"> Describe the relationship between friction and the roughness of a surface. Identify examples of friction being useful or not. Predict attraction and repulsion between like and opposite poles. Identify examples of magnetic and non-magnetic materials. Name some examples of types of magnet and compare their strengths. Describe some examples of the uses of magnets. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none"> Use arrows and scientific vocabulary to show the direction of a contact force. Use evidence to support conclusions. Identify the variables to change, measure and control. Write a method to explain how to use a magnet to sort and classify materials as magnetic or non-magnetic. Label the axes of a bar chart. Draw bars on a chart accurately. Identify key information from a source. Use more than one source to research a question. 	
Year 4	<p style="text-align: center;"><u>States of matter</u></p> <ul style="list-style-type: none"> Identify solids, liquids and gases using their properties. 	<p style="text-align: center;"><u>Electricity</u></p> <ul style="list-style-type: none"> Recall a range of electrical appliances and classify them as mains or battery-powered. 	<p style="text-align: center;"><u>Living things and their habitats - TBU</u></p> <ul style="list-style-type: none"> I can recognise that living things can be grouped in a variety of ways

Grange Primary School

Science Curriculum Overview

	<ul style="list-style-type: none"> Describe melting, freezing, condensing and evaporating. Describe the different stages of the water cycle. Describe how temperature affects the rate of evaporation and therefore the water cycle. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none"> Ask relevant questions. Use results to draw simple conclusions. Use thermometers to take accurate measurements. Make predictions for new values. Record findings using labelled diagrams. Research using more than one source. <p style="text-align: center;"><u>Sound</u></p> <ul style="list-style-type: none"> Describe how sounds are made. Describe how sounds are heard through different mediums. Explain the relationship between vibration strength and volume. Describe the relationship between volume and distance. Describe pitch and how to change it. Explain how insulating materials can be used to muffle sound. 	<ul style="list-style-type: none"> Explain why something is either mains or battery-powered. Explain how to test if a circuit works and identify when simple electric circuits will work. Identify symbols for open and closed switches. Predict whether a circuit will work based on whether the switch is open or closed and explain that it works by breaking and completing a circuit. Give examples of how switches are useful. Describe that a material is a good electrical conductor when it is added to an electric circuit and the bulb lights. Describe that a material is a good electrical insulator when it is added to an electric circuit and the bulb does not light. Recall that metals, for example, are good electrical conductors and plastics, for example, are good electrical insulators. Describe that the more bulbs added to a series circuit, the dimmer the bulbs will be. Explain that the bulbs will be dimmer when more are added to a circuit, as less energy is transferred to each of them. 	<ul style="list-style-type: none"> I can explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment I can recognise that _environments can change and that this can sometimes pose dangers to living things. <p><u>Consolidation</u></p>
--	---	--	--

Grange Primary School

Science Curriculum Overview

	<p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none">• To observe closely how different instruments create a sound.• Research how whales and dolphins communicate underwater.• Present results using a bar chart.• Suggest which variables to measure and for how long.• Design simple results tables.• Identify when results or observations do not match predictions.	<ul style="list-style-type: none">• Describe precautions for working safely with electricity.• Explain some precautions using knowledge of circuit diagrams, electrical components, conductors or insulators. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none">• Draw a results table and record a range of appliances under the correct headings 'Mains' or 'Batteries'.• Identify and draw simplified electric circuit symbols and use these to draw a simplified circuit diagram.• Write a method for the investigation that considers appropriate equipment, ordering clearly written steps and considering safety.• Pose questions relating to bulbs in an electrical circuit.• Explain why a selected question is testable.• Suggest that new inventions will change safety advice <p><u>Animals including humans</u></p> <ul style="list-style-type: none">• Label key organs found in the digestive system and describe each of their functions.	
--	---	---	--

Grange Primary School

Science Curriculum Overview

		<ul style="list-style-type: none">• Describe the functions of the four different types of adult, human teeth, using key vocabulary.• Know that good dental care involves brushing their teeth twice a day with toothpaste and a soft toothbrush.• Produce a food chain that begins with a plant and has arrows that move up the food chain.• Define a producer, predator and prey and identify examples in food chains.• Describe digestion, teeth and diets when talking about the observed poo clues.• Write a letter that uses a range of scientific vocabulary from the unit. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none">• Evaluate a strength or weakness of the digestive system model.• Describe an example of evidence that can be used to study teeth.• Identify some of the variables that need to be kept the same, predict an outcome and identify limitations to the experiment.• Recall that scientific research needs repeated results before use in society.	
--	--	---	--

Grange Primary School

Science Curriculum Overview

		<ul style="list-style-type: none"> Identify trends in a predator-prey graph. Draw a results table that has space for observations about different poo samples. 	
Year 5	<p><u>Properties and changes of materials – Properties and Changes</u></p> <ul style="list-style-type: none"> Determine the hardness of different materials and link this to their uses. Determine the transparency of different materials and link this to their uses. Determine the thermal and electrical conductivity of different materials and link this to their uses. Demonstrate, identify and describe reversible and irreversible changes. <p>When working scientifically pupils who are secure will be able to:</p> <ul style="list-style-type: none"> Evaluate the hardness test to determine the degree of trust in the results. Plan and draw a table of results. Write a detailed, organised and easy to follow method. Write a prediction using prior knowledge of the states of matter. 	<p><u>Earth and Space</u></p> <ul style="list-style-type: none"> Describe the geocentric and heliocentric models. Name and describe the shape of celestial bodies. Describe the orbits of celestial bodies in the Solar System and name the force that keeps them in their orbits. Describe the orbit of the Moon around the Earth and its phases. Explain how day and night occur. Explain how the seasons occur. Explain how a sundial works. List some of the uses of satellites and explain why space junk poses a problem to them. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none"> Pose and identify testable questions about the movement of the celestial bodies in our Solar System. Use a model to represent the Solar System. Design and draw a table to record data on moons. 	<p><u>Forces - TBU</u></p> <ul style="list-style-type: none"> I can explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth, and the falling object I can identify the effects of air resistance, water resistance and friction, that act between moving surfaces. I can recognise that some mechanisms including levers, pulleys and gears allow a smaller force to have a greater effect. <p><u>Consolidation</u></p>

Grange Primary School

Science Curriculum Overview

	<ul style="list-style-type: none"> Analyse observations about rusting and use them to support a conclusion. Measure accurately in centimetres. <p><u>Properties and changes of materials – Mixtures and Separation</u></p> <ul style="list-style-type: none"> Define the term 'mixture' and name some common examples. Define the term 'sieving' and explain how sieving separates mixtures. Define the term 'filtering' and explain how filtering separates mixtures. Define the terms 'solution' and 'dissolve' and name some common examples of solutions. Recall some factors that affect the time taken to dissolve. Describe the effect of temperature on the time taken to dissolve. Define the term 'evaporating' and explain how evaporating separates solutions. Identify when sieving, filtering and evaporating should be used. <p>When working scientifically pupils who are secure will be able to:</p> <ul style="list-style-type: none"> Research a mixture to find out what substances it is made from. 	<ul style="list-style-type: none"> Accurately draw day and night and seasons diagrams. Calibrate a sundial using a compass and torch and use it to measure time. Analyse patterns in temperature data for the Earth and use them to predict temperature values for the Earth in the future. <p><u>Living things and their habitats</u></p> <ul style="list-style-type: none"> Describe the life cycle of a plant, including the reproductive stage. Describe the life cycle of a mammal. Describe the life cycle of a bird and compare it with that of a mammal. Describe the life cycle of an amphibian. Describe the life cycle of an insect and compare it with that of an amphibian. Describe asexual reproduction in plants. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none"> Observe and compare equivalent parts in different flowers. Research the life cycles of different mammals. Pose questions to compare the life cycles of different birds. 	
--	--	---	--

Grange Primary School

Science Curriculum Overview

	<ul style="list-style-type: none"> • Draw and annotate a diagram to explain how sieving separates a solid-solid mixture. • Identify and justify which type of enquiry to use to answer my testable question. • Identify solutions by observing and describing their appearance. • Suggest which variables to change, measure and control when investigating how temperature affects the time taken to dissolve. • Choose which measurements to take and how long to take them for. <p>Animals including humans -TBU</p> <ul style="list-style-type: none"> • I can describe the changes as humans develop to old age. 	<ul style="list-style-type: none"> • Suggest how one temperature may affect egg hatching. • Use data to describe a relationship and make predictions. • Represent root growth over time on a line graph. 	
Year 6	<p>Animals including humans - TBU</p> <ul style="list-style-type: none"> • I can identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood. • I can recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function. 	<p>Living things and their habitats</p> <ul style="list-style-type: none"> • Define the term 'organism' and name the seven life processes of all living things. • Describe the work of Carl Linnaeus. • Define the term 'vertebrate' and name the vertebrate groups. 	<p>Evolution and inheritance</p> <ul style="list-style-type: none"> • Define and identify variation in organisms and recall that it is caused by inherited and environmental factors. • Recall that living things produce offspring of the same kind but are not normally identical to their parents.

Grange Primary School

Science Curriculum Overview

	<p>• I can describe the ways in which nutrients and water are transported within animals, including humans.</p> <p>Electricity</p> <ul style="list-style-type: none"> Describe the function of key electrical components and explain how the models used in the lesson represent these. Correctly predict if an electrical circuit will work or not, explaining why using their knowledge of complete loops, power sources and presence of components. Describe the relationship between the number of bulbs in a circuit, the bulb brightness and the amount of resistance. Explain that increasing the number of components increases the resistance, affecting the flow of current and energy transferred. Identify that batteries are a voltage source; they come in different voltages, affecting bulb brightness. Describe that voltage can be changed using different numbers of cells in a circuit and that more cells or a higher voltage causes brighter bulbs. Use the relationship between voltage and bulbs to predict 	<ul style="list-style-type: none"> Describe the characteristics of fish, amphibians, reptiles, birds and mammals. Compare the characteristics of the vertebrate groups. Define the term 'invertebrate'. Describe the characteristics of worms, snails, spiders and insects. Compare the characteristics of the invertebrate groups. Name the plant groups. Describe the characteristics of flowering plants, ferns, mosses and conifers. Define the term 'micro-organism' and name some examples. <p>When working scientifically pupils who are secure will be able to:</p> <ul style="list-style-type: none"> Use a classification key to group and identify organisms. Make a simple classification key <p>Light</p> <ul style="list-style-type: none"> Compare sources of light and explain how the eye is protected from light. Describe how light travels and how we see luminous and non-luminous objects. Recall factors that affect the size of a shadow and describe how the distance between an object and the surface its shadow is cast on affects the size of the shadow. 	<ul style="list-style-type: none"> Describe patterns of inheritance from parent to offspring in a given example or family tree. Describe what an adaptation is; it cannot be chosen and is usually inherited. Describe key characteristics that would help an organism to survive and explain how an adaptation helps the organism to survive. Explain how variation may affect survival within a population and recall what natural selection means. Recall what evolution is, identify differences between a living thing and its ancestor and describe key steps in the evolution of a species. Recall different types of evidence that can be used to explain evolution and describe methods that make scientists' results or conclusions more trustworthy. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none"> Sort variation as environmental, inherited or a mixture of both. Evaluate a method by recalling variables that were effectively kept the same and those that were harder to control.
--	---	---	---

Grange Primary School

Science Curriculum Overview

	<p>what will happen with buzzers and motors.</p> <ul style="list-style-type: none">• Build an electrical circuit with a switch to control its function, explain how the switch and the electrical circuit solve the problem and recall different examples of problems that can be solved using an electrical circuit. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none">• Draw circuit diagrams with straight lines and using standard circuit symbols.• Design a results table with an appropriate number of columns and headings with units.• Identify the changed, measured and control variables in an enquiry to plan a method.	<ul style="list-style-type: none">• Use ray diagrams to explain why shadows change size and why the shape of a shadow matches the object that cast it.• Recall what happens to light when it reaches a smooth mirror surface.• Identify the incoming and reflected rays and describe the relationship between their angles.• Use mirrors to make a working periscope and explain how a periscope works using ray diagrams.• Recall a range of uses of mirrors and reflection and describe how a mirror reflects light in different situations.• Explain how light is reflected using knowledge of light and reflection. <p>When working scientifically, pupils who are secure will be able to:</p> <ul style="list-style-type: none">• Make observations about the properties of light.• Use my observations as evidence to support conclusions about light.• Draw ray diagrams.• Pose testable questions in response to observations.• Record my measurements as a line graph.	<ul style="list-style-type: none">• Comment on the reliability of the results and the degree of trust.• Consider how evidence is used to form theories and the degree of trust the evidence offers. <p style="text-align: center;">Consolidation</p>
--	--	---	--

Grange Primary School

Science Curriculum Overview

		<ul style="list-style-type: none">• Use my line graph to extrapolate data and make predictions about missing values.• Recall various jobs or inventions that use mirrors and reflection.	
--	--	---	--
